Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hitomi et al (5,168,839). Note an intake manifold for an engine including an engine block with at least one cylinder inlet which is supplied with an air-fuel mixture from the intake manifold 10 the intake manifold comprising: a housing defining an interior cavity (convergent portion 15) and having an exterior surface, the housing having at least one air in-flow passage 13 from the exterior surface of the housing to the interior cavity and the housing including at least one side wall, the side wall having a substantially planar side wall interior cavity surface and a side wall exterior surface, the side wall defining at least one air-fuel out-flow passage 11 from the interior cavity to the side wall exterior surface, the housing having at least one fuel in-flow passage, surrounding injector 20, from the exterior surface of the housing to the air-fuel out-flow passage between the interior cavity and the exterior surface of the housing, wherein the intake manifold is mounted to engage the engine block so that the air-fuel out-flow passage and the engine cylinder inlet are aligned to allow the air-fuel mixture to pass from the air-fuel out-flow passage to the engine cylinder inlet 5 (see Figures 3 and 4).

With respect to claims 8 and 9, note also an intake manifold 10 for an engine, including an engine block with at least one cylinder inlet 5, the intake manifold comprising: a housing having an exterior surface and defining an interior cavity 15, the housing having at least one air in-flow passage 13 from the exterior surface of the housing to the interior cavity, the housing having at least one side wall, the side wall defining at least one air-fuel out-flow passage 11 from the interior cavity to the side wall exterior surface, and the housing defining at least one fuel in-flow passage, surrounding injector 20, from the exterior surface of the housing and opening into the air-fuel out-flow passage, the housing defining at least one fuel in-flow passage, surrounding injector 20, from the exterior surface of the housing and opening into the air-fuel out-flow passage between the interior cavity 15 and the exterior surface of the housing.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 703-308-1956. The examiner can normally be reached on flex.
